

December 2020

Dear colleague/expert,

You are invited to share your opinion with us about the organizational structure of schools in order to become successful STEAME schools.

We are a team of seven European partners working on the project **STEAME - Guidelines for Developing and Implementing STEAME Schools**. The project leverages on the concept of STEAME (Science, Technology, Engineering, Arts, Mathematics, Entrepreneurship) education and its related learning activities in the school environment, such as project-based work of students, and therefore the school infrastructure is a very important element.

We are now in the process of developing the third output - **Guidelines for STEAME School Organizational Structure** and we would highly appreciate your contribution by filling out the questionnaire that you can find by pressing [HERE](#).

The results of this survey will be sent to those who respond to this survey.

***From those responding, randomly 3 will have the opportunity to win partial funding for attending the European STEAME Conference, during 22-24 June 2021 to be hosted in Paphos, Cyprus.***

Thanking you in advance!  
THE STEAME Consortium
